DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 6-10 is withdrawn in view of the newly discovered reference(s) to Colvin et al. 6066160. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 6 recites the limitation "the longitudinal axis of the body" in line 10. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

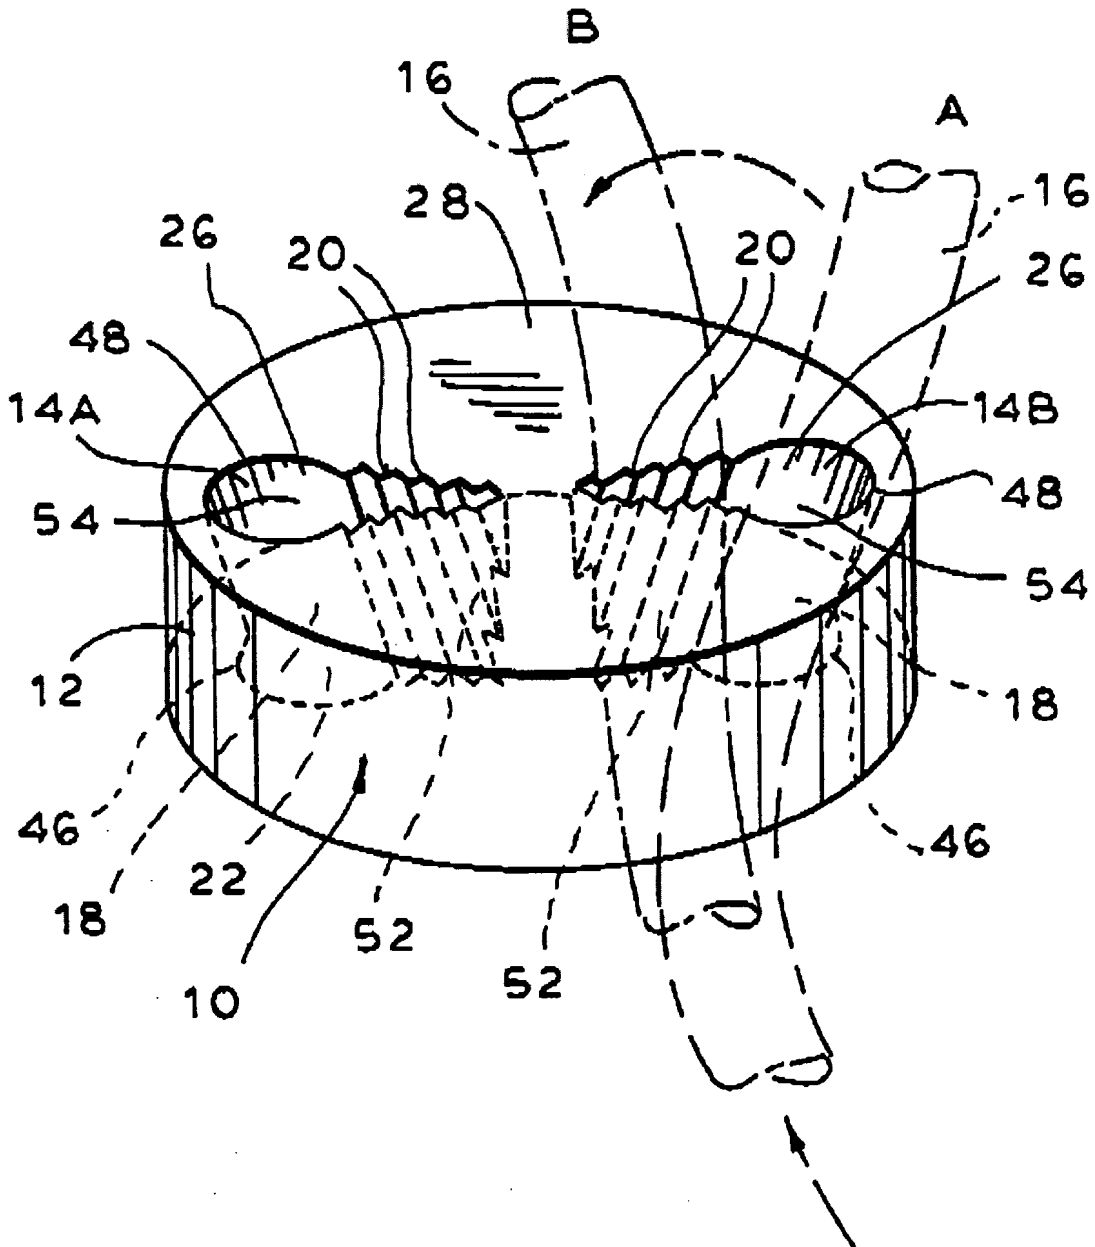

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Colvin et al. 6066160.

7. Colvin et al. teaches a tensioner comprising a tensioner body having a first opening and a second opening passing therethrough, wherein the first opening has a

first section and a second section, wherein the first opening and the second opening are collinear and located along the longitudinal axis of the body; wherein the tension is formed of plastic; wherein the first section of the first opening has a circular cross-section; wherein the second section of the first opening is an elongated slot; wherein the second opening is an elongated slot.
